

ASSEMBLY INSTRUCTIONS

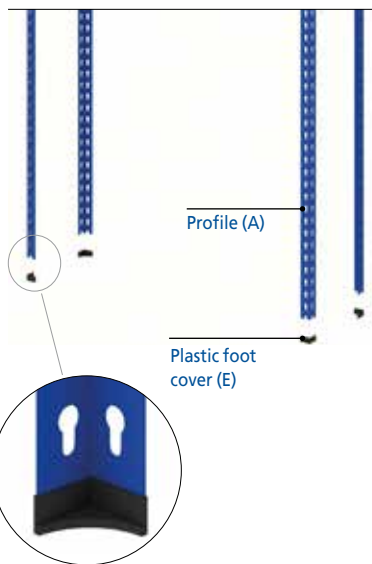

# METAL POINT 2 SHELVING

## Assembly of the structure

**1**

Firstly, place the plastic foot cover (E) on the bottom of each profile (A).

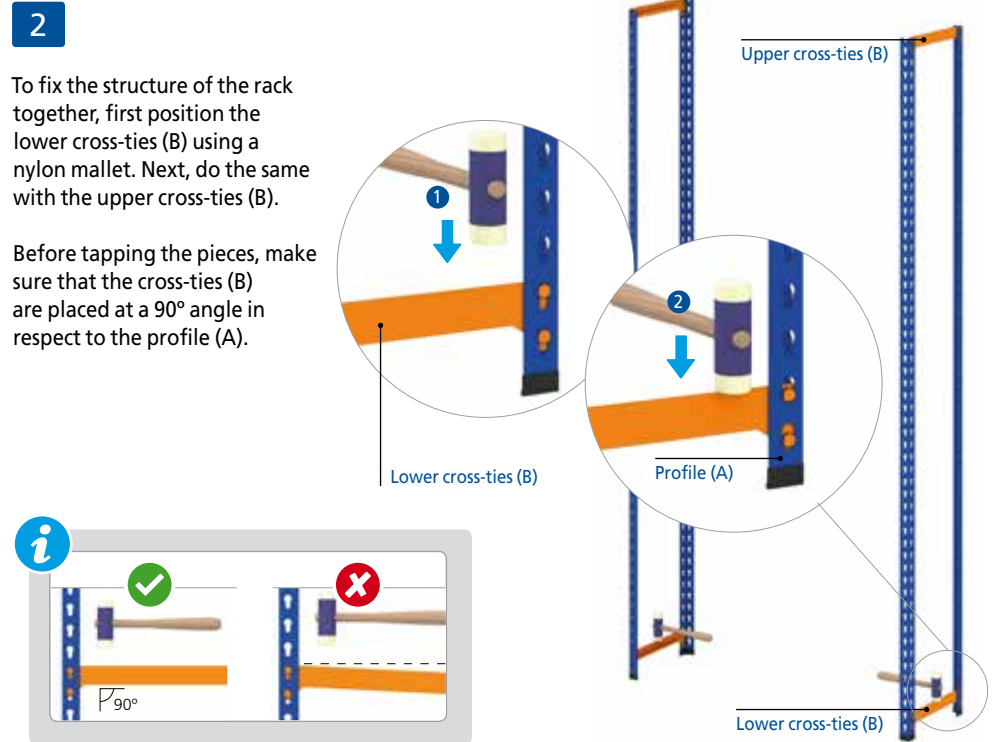

Profile (A)

Plastic foot cover (E)

**2**

To fix the structure of the rack together, first position the lower cross-ties (B) using a nylon mallet. Next, do the same with the upper cross-ties (B).

Before tapping the pieces, make sure that the cross-ties (B) are placed at a 90° angle in respect to the profile (A).

Upper cross-ties (B)

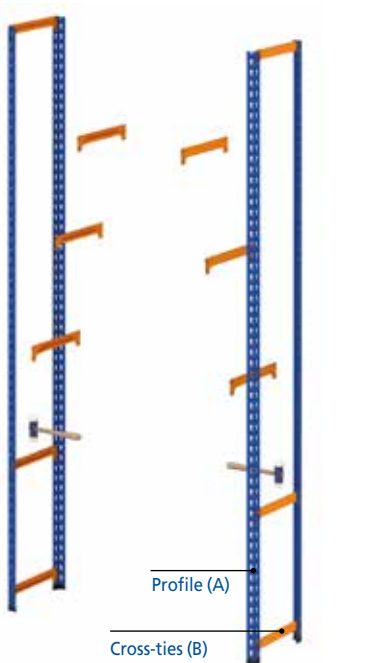

Lower cross-ties (B)

Profile (A)

90°

**3**

Once installed, place the four remaining levels of cross-ties (B).

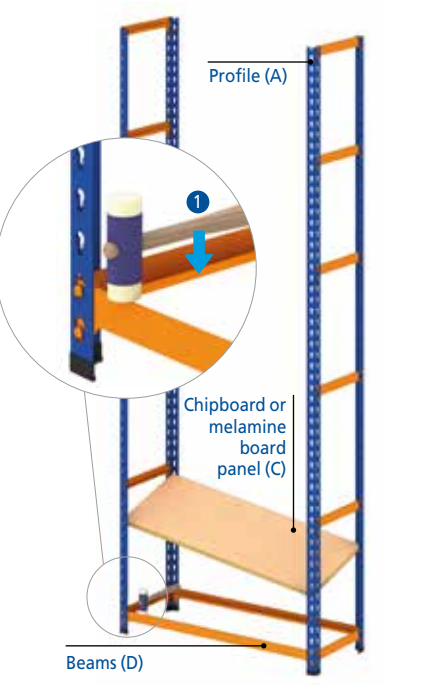

Profile (A)

Cross-ties (B)

**4**

Next, fix the beams (D) of the lower level like the cross-ties were (B), and check they are positioned at the same level.

Profile (A)

Chipboard or melamine board panel (C)

Beams (D)

**5**

Before placing all the beams, insert the shelf (C). Then, mount the next level and, so forth, from bottom to top.
